COLUMBUS/GROVE CITY ELKS LODGE #37

February 2023

Published by the Columbus/Grove City Elks Lodge #37, Grove City, OH 43123

February ER Message

Greetings fellow Elks!

It is the time of year each of you can exercise your right to nominate/ballot on lodge year 2023/2024 officers. Nominations will be during lodge meeting held Monday Feb 13, 2023 at 7:00 PM. Any and all contested positions will be balloted by secret vote at lodge meeting held Monday Feb 27, 2023 at 7:00 PM. The positions are: Exalted Ruler, Leading Knight, Loyal Knight, Lecturing Knight, Secretary, Treasurer, Inner Guard and 5 year Trustee. Individuals holding some positions may wish to remain in their position but will still need to be nominated. Also, some individuals may have a desire to change their position.

Please step up and lead your lodge into the future!

On a wonderful note: we were informed that the South Central District, of which we fall, are doing a fabulous job with member retention and new members. Keep up the good job with recruitment.

Finally, the Elk for Elk Rest has arrived at Green Lawn Cemetery. As of the date of this writing, Green

Lawn officials are waiting for the ground to freeze (imagine that in January in Ohio), so they can place the granite.

As a friendly reminder: Is your behavior and language worthy of an Elk. This is not only in the Lodge Room. Should be in Club Room also.

I am always available for concerns, ideas, thoughts. I can be reached by:

What the Elks are all about

So long as there are veterans, the Benevolent and Protective Order of Elks will never forget them. Our Order has a glorious history in supporting our veterans. The Elks built a 700-bed hospital in Boston and donated it to the federal government as the first VA hospital following WWI. Our order also established the first GI loan

Elks Care. Elks Share.

Cerebral Palsy major charity of Elks Ohio.

DAMAGE TO THE WHITE MATTER OF THE BRAIN

(periventricular leukomalacia, or PVL) The white matter of the brain is responsible for transmitting signals inside the brain and to the rest of the body. Damage from PVL looks like tiny holes in the white matter of an infant's brain. These gaps in brain tissue interfere with the normal transmission of signals. Researchers have identified a period of time between 26 and 34 weeks of gestation, in which periventricular white matter is particularly sensitive to injury.
